Salinas Police Services Headquarters Building
City of Salinas, CA

A new $56M, two-story, 44,352 square foot building, with a second, 24,878 square foot building for the City of Salinas

The facility houses all first responder functions and has been built to the highest life safety building standards for wind and seismic events. The facility includes state-of-the-art evidence storage areas, forensic laboratories, canine and bicycle officer support and a ten-station firing range.

Project Successes

1. The project was able to incorporate several ancillary components that were not part of the original project scope that otherwise would have been funded through the City. These included street lighting, a traffic signal, curbs and gutters, and the cleanup of contaminated soil that exceeded the original contracted obligation. A portion of the City's fiber optics installation project was also completed using project funds. All of this was done to accommodate the City's objectives in their Alisal Market Master Plan.

2. Project was delivered on-time and on-budget, despite the challenges of unprecedented federal tariffs and a global pandemic.

3. Awarded the ENR California 2020 Government/Public Buildings Best Project – Northern Region Award.

4. Awarded an IEDC International Economic Development Council's 2020 Excellence in Economic Development Award in the category of Public-Private Partnerships.
